Accurate Sensors Technologies was founded in 1994 to focus exclusively on non-contact temperature measurement solutions for Aluminium surfaces with low, unstable and variable emissivity characteristics. Today AST is a leading name among manufacturers of infrared temperature measurement devices for different industrial applications as well as research & development. Our comprehensive product portfolio includes Infrared Pyrometers, Thermal Imagers, Furnace monitoring systems and black body furnaces for Processes Industries like Steel, Aluminium, Cement, Glass, and non-metals and various R&D applications. We use innovative approaches for handling the unstable targets and intermediate conditions common to process industries via achieving a degree of accuracy far better than other products available in the market.
