This single line encapsulates the successful journey of **Acme Universal Safezone 9 Private Limited**, over the past **25 years**.

Beginning in **1994**, in the culturally rich city of Gwalior, the first challenge Acme faced was the lack of safety awareness in India. The demand-supply matrix simply did not exist for safety shoes. Over the years, Acme has not just addressed this imbalance, but through its pioneering efforts, played a major part in building the industry itself.

Today ACME has a production capacity of **4,000,000 pairs** per annum, the HIGHEST in India. Right since the start, we have continued to break new ground with innovative offerings and over the past decade have expanded to six different locations manufacturing industry-based safety footwear, being headquartered in Mumbai.
