

Adventure Paddleboarding Explorer 2 CX Stand Up Paddle Board - 11'

Address	Singapore Land Tower 4th Floor, 50 Raffles Place
Contact Person	Carlos Jumar
Mobile Number	
Email	order@asiankayak.com

Features

- Updated with extra width and volume to increase stability; full rails keep the board high on the water for easy touring and long exploratory missions on flatwater
- Carbon Fusion (CX) construction keeps things light with 2 layers of carbon, multiple layers of fiberglass and unidirectional carbon tape applied to a medium-density EPS core
- This vacuum-bagging process ensures the maximum bond is formed without an excess use of epoxy resin
- Perimeter lanyard plugs create both forward and aft storage zones, converting this to a utility SUP to haul your fishing and touring gear
- Custom touring fin has a square outline with full tip that produces nice acceleration and glide while maintaining a high distance-to-stroke ratio
- Chop-piercing displacement hull and narrow nose cut through the water and soften chatter in bumpy conditions
- Tapered tail helps retain the glide and flow of a more streamlined race board, and also aids with pivoting and making directional changes
- Comfortable cavity handle for convenient transportation to and from the water
