All Carbon Corporation (ACC) is established in 2005. Our current service scope includes purification, filtration & adsorption materials, building material and refractory additives and silicon materials, etc.

Main products: activated carbon, anthracite filter media, silica fume, superplasticizer.

For activated carbon, ACC supplies wood, bamboo, coal, coconut shell and other material based activated carbon, uses the process of steam activation, chemical activation, granulation and kinds of activated carbon production technology to provide extruded activated carbon, granular activated carbon, powdered activated carbon, and spherical activated carbon.

For silica fume (microsilica), we offer densified silica fume (min SiO₂ 85%-97%, gray); undensified silica fume (min SiO₂ 85%-96%, gray); and zirconia silica fume (SiO₂ + ZrO₂, white).
