Containerization is an industry that has rapidly evolved since its inception. Constant fluctuations and technological advancements in global supply trade have underscored the need to redefine container solutions. Established in 2020, ARCON, part of the Saksham Group of Companies is reimagining global container logistics through solutions that are cost-effective and sustainable, providing innovative offerings for one-way container movement, container trading and container leasing. At the heart of ARCON's mission is a commitment to enhancing overall container productivity. By leveraging a combination of technology and human expertise, ARCON introduces innovative offerings for one-way container movement, container trading, and container leasing. The company's services, which include one-way containers, click-to-trade, and lease-with-ease, are designed to bring about greater operational efficiency, unlocking significant value for customers. While we build tech-driven, innovative solutions, we have a tremendous responsibility towards society and our planet. Sustainability is the foundation of our business and a key to our long-term success. ARCON Container prowess extends to chemical logistics, where it introduces T14 ISO tanks into its comprehensive range of services. By integrating chemical logistics with ISO tanks, ARCON reaffirms its position as a logistics powerhouse, providing a holistic and versatile solution for the transportation of chemical substances.
