**Mirror Institute For Embedded Technology** is the pioneer embedded training institute in Chennai. Through our rigorous embedded training, we have created excellent embedded placement records. We have comprehensive suite of embedded software training ranging from beginner to advanced level. We can give training on how embedded systems implement, evaluate, develop and integrate with other systems.

100 Products is professional course especially for "EMBEDDED TECHNOLOGY" founded in the year 2010. The name which implies that training is especially for 100 members with sufficient environment.

As they say "Efficiency is doing things right, Effectiveness is doing right things" we are doing things effectively. We offer embedded course for individuals who wish to make their career in embedded system

"Skills to do comes of doing" we ensuring a complete practical exposure during their learning process, with the help of corporate people. Apart from technical skills we also concentrate in communication skills to survive in the corporate world. We are equipped in training the candidates by highly experienced industrial members. We have been teaching these things for years now and we conducts four hours per day which makes their knowledge and control over the concepts are as natural as we breathe

We create a path for their innovative and creative ideas. After completion of this course the students will get placed in their suitable position
