Brook One Corporation is a manufacturer of an innovative, fire barrier cover film designed specifically for aircraft thermal/acoustic insulation systems.

Brook One now offers 4 High Performance, Burnthrough/Fire Barrier Cover Films ! Standard (metallic & non-metallic) Lightweight (metallic & non-metallic). Our product is lightweight, durable and a technologically advanced laminate that is the most flexible and toughest on the market today! Unlike other cover films that are weak, rigid and more susceptible to de-lamination and cracking, the Brook One product is constructed to provide a high performance fire barrier solution!

The Brook One fire barrier product has surpassed all fire testing requirements as established by the Federal Aviation Administration (FAA) including:

FAR (a) – Flammability

FAR (b) – Burn Through
