I am Padmanabh Acharya, an expert astrologer at GaneshaSpeaks. I have essential skills of Vedic Astrology and here I will explain to you all about the Gemstones.

Buy online Gemstones which produce strength through vibrations that are absorbed by each person's internal aura, making the aura strong enough to fend against harmful external vibrations.

The lustrous, canary-coloured Yellow Sapphire, also known as Pukhraj or Jupiter Stone, is a member of the Corundum mineral group. Yellow sapphires are a gentle tint that naturally represents happiness and success. The iron and colour centres in the gem give them their colour. The healing properties of these gems are enhanced by warmer metals like rose and yellow gold, which go well with the sun-kissed colours of these yellow sapphires.
