CENTRIFUGE DRIVE PLANETARY

Top Gear Transmission is one of the prominent manufacturers of centrifuge drive planetary in India. A decanter is a machine where the horizontal conical vessel rotates at very high speed and the centre of the vessel there is a scroll which also rotates in the same direction at the differential speed which allows separation of solid and liquid.

The Centrifuge planetary drive used in the decanter machine is a high precision gearbox where all the gears have an accuracy of DIN1 6 & are dynamically balanced to withstand the high speed of maximum 4000 rpm

We are well known for providing transmission solutions such as centrifuge drive planetary for decanter machine to our clients by understanding their requirements and analyzing their business processes.
