Century Plyboards (India) Ltd. is India's leading manufacturer, seller and exporter of plywood, laminates and veneers. Established in 1986 in Kolkata by Shri Sajjan Bhajanka and Shri Sanjay Agarwal, they now export their range of products to over 20 countries. Since its inception, the company has come up with a unique range of products and has been constantly innovating according to dynamic global trends. In 1997, CenturyPly became the pioneers of Borer-Proof Plywood in India, elevating their product standards.

In 2004, the CenturyLaminates plant commenced operations. Once it hit the markets, it instantly catapulted to the top. CenturyPly's success is reflected by a consistent, year-on-year growth rate with "Construction World", one of the most definitive business journals, adjudging it as, "The Fastest Growing Company with the Highest Turnover" consecutively for five years in 2003, 2005, 2006, 2007 and 2008. The company seeks to continue its successful innovations and deliver ground-breaking products.

Their latest innovation is the application of ViroKill Technology to manufacture all CenturyLaminates & CenturyPly varieties, in which highly energised nanoparticles are ingrained on the product's surface, killing up to 99.99% bacteria, fungus, microbes & viruses on contact. The technology has been certified by Biotech Testing Services, Mumbai for its efficacy against these invisible threats.
