Established in 1996, **Chemey Mechatronics LLP** has grown into a leading safety systems provider headquartered in Ahmedabad, Gujarat, India. With a rich legacy spanning over two decades, Chemey specializes in engineered solutions that ensure fall protection, safe access, and perimeter safety for industrial, commercial, and infrastructure applications worldwide.

Chemey delivers a comprehensive product range from industrial guardrails and safety gates to modular barricades, ladders, scaffolding, and rooftop walkways built with high-grade aluminium and engineered for durability, reliability, and compliance with global safety standards such as OSHA and IS codes.

Driven by innovation, quality, and customer-centric design, Chemey combines technical expertise with customizable solutions to meet diverse client needs. Its products and services support safer work environments across sectors including construction, manufacturing, logistics, energy, and more. Endurail Guardrail Systems, Industrial Safety Gates, Modular Barricades, Aluminium Scaffolding, Platform & Access Ladders, Mobile Work Platforms, Lifeline & Fall Protection Systems, Skylight Safety Covers, Perimeter Security Fencing, Solar Roof Walkway Systems, Machine Guarding Systems, Aluminium Floor Grating.

Products:

Endurail® Aluminium Structural Fittings, Slip-On Pipe Fittings, Aluminum Handrail Systems, Modular Railing & Guardrail Solutions, Solar Rooftop Railings & Walkways, Enduplank Rooftop Walkway System, Roof Skylight Safety Cover , Fall Arrest Systems, Self-Closing Safety Gates, Machine Guardrails & Perimeter Protection, Expandable Safety Barricades, Portable Work Platforms & Scaffolding, Mobile Tanker Access Platforms & Folding Stairs, Marine & Industrial Aluminum Gangways, Platform Ladders, Folding Ladders, Double-Sided Ladders, Tube Clamp Fittings, Automatic Gate Operators, Aluminum Floor Gratings

By Category:

Gangway & Industrial Ladders

This category includes specialized access ladders and gangways designed for safe vertical and inclined access in industrial settings. Products here help workers move between different levels safely such as fixed industrial ladders, marine or platform gangways, folding ladders, and ladders for tankers or equipment.

Lifeline

Lifeline systems are fall-protection safety solutions used when performing work at heights. They include horizontal and vertical lifelines, harness attachment systems and safety anchor points that help limit falls and ensure secure movement along rooftops, edges, or elevated platforms.

Perimeter Security

This category focuses on security and boundary protection solutions such as mesh fences, perimeter barriers, razor wire options, and gate systems that keep industrial premises or restricted areas secure and controlled.

Safety Barrier

Safety barriers are protective barricades designed to restrict or redirect traffic, block off hazard zones, or separate work areas for worker safety. This includes heavy-duty barricades, expandable barriers, and modular barricading systems for both industrial sites and public access zones.

Safety Gates

These are gate solutions with safety mechanisms used at access points to control movement and protect personnel. Products in this category typically include self-closing industrial safety gates, pallet safety gates, mezzanine gates, and other gating systems that prevent accidental falls or unauthorized access.

Safety Railing

Safety railings are fixed protective railing systems that prevent falls along edges, walkways, stairs, rooftops, or machinery zones. These systems often modular and made from corrosion-resistant materials like aluminium provide continuous guardrails for workplaces, industrial roofs, or elevated platforms.

Skylight Fall Protection Covers

This category includes protective covers and screening systems fitted over skylights or roof openings. These prevent workers from falling through glazed or open roof areas while still allowing light penetration and safe rooftop operations.

Walkway Grating

Walkway grating refers to flooring & structural panels installed on rooftops or elevated walkways to provide a safe and non-slip walking surface. These are often used in combination with railings and lifeline systems to create fully protected industrial walkways.

Work Platforms

Work platforms are elevated working surfaces and mobile units designed to support personnel and tools at height. This category includes portable platforms, scaffolding towers, cantilever platforms, mobile access platforms, and engineered standing surfaces that enhance safety and ergonomics during elevated tasks.

By Hazard:

- Fall Hazards & Unprotected Edges
- Trip Hazards & Obstructions
- Loading / Bulk Material Zones
- Elevated Workplaces
- Rooftop Openings & Walkways

Why Choose Chemey Mechatronics LLP?

- ISO-certified quality with manufacturing excellence.
- Global compliance standards including OSHA, IS, and EN codes.
- Modular, weld-free systems for rapid deployment and reduced labour.
- Customized solutions tailored to project needs.
- Made in India with global performance for industrial safety and access.

Industries We Serve:

- Construction & Infrastructure
- Manufacturing & Industrial Sites
- Warehousing & Logistics
- Oil & Gas
- Marine & Offshore
- Solar Energy Projects
- Commercial & Residential Buildings
