Shanghai Shinjo Pump Co., Ltd. (<https://www.shinjopump.com>) is a well-known large-scale factory, specializing in research, development, manufacturing, sales and service of pumps. Shinjo Pump has standardized workshops and office buildings with an area of 15,000 square meters as well as a pump test center equipped with a complete set of testing equipment and tools.

Our pumps mainly include the following:

- Centrifugal pumps
- Chemical process pumps
- Diaphragm pumps
- Magnetic drive pumps
- Multi-stage pumps
- Oil pumps
- Screw pumps
- Self-priming pumps
- Sewage pumps
- Slurry pumps
- Vertical submerged pumps

All of our pumps meet and exceed all requirements of ISO 15783 & API standards. Shinjo Pump values the development of technology and new products. New pump products are released very year after our experts and senior engineers put effort into their work. Pumps made by Shinjo have excellent performance and quality, which have obtained various professional certifications and customer recognition.
