Team EarthtronEV understands the need and importance of EV charging stations in the near future. Developed countries have started replacing their petrol and diesel-based vehicles with electronic ones. It's a revolutionary step that every country will adopt sooner or later as per our environmental needs. And the day is not far when India will set a benchmark by replacing all the fuel-based vehicles with Ev as it's a need of today's world. EarthtronEV aims to connect highways and intercities by providing budget-friendly EV charging stations. These charging ports will be equipped with various facilities and offer a super-fast charging service.
