Endel Digital Solutions is a leading software company that offers the best innovative software solutions for industry verticals like weighing, engineering, mining, manufacturing, and research laboratories. We take the lead with our weighbridge software, lab management software development, and ORECS ERP Solutions which are designed to help you manage and track all critical information with industrial automation.

Our Digital weighbridge software solution is designed for complete automation, to reduce human dependability. This is enabled through our weighbridge software which integrates various hardwares to provide the ultimate unmanned weighing solution. Our expertise and experience in working with various industries, has allowed us to venture into Enterprise Resource Planning (ERP) solutions, that can manage all the core supply chain, manufacturing processes, HR, financial and other key processes of an organization. Our ERP solutions are designed for specific industries, such as building construction, machine rental, manufacturing, and more. Lastly, our Laboratory information management system helps the entire lab management system to manage manpower scheduling, data samples, experiments, and results.

Endel Digital Solutions wasfounded to endow the esteemed clients with the optimum IT and industrialsolutions with a weighing (weighbridging)solution. We are recognized in the market for comprehensivelyaccomplishing our client's needs in an efficient and budget-friendly manner. Wehave consistently committed ourselves to achieve the reliability andsuperlative performance of our services.
