FAB Builder is an all-in-one platform for businesses to build, analyze, and engage with customers. It offers FAB Studio, a low-code platform and code generator for app and web development. FAB Analytics provides comprehensive user behavior tracking, app analytics, and website analytics, with analytics reports automation for deep insights. FAB Customer Experience acts as a robust CRM software, managing lead management and facilitating multi-channels communication tools. Lastly, FAB Page Pilot enables personalized user experiences. FAB Builder simplifies application development, provides crucial insights into user behavior, and enhances customer engagement through its integrated suite of tools.
