A face pack is a skincare product applied to the face to address specific skin concerns, such as dryness, acne, or dullness. Typically made from natural ingredients like clay, herbs, or fruits, face packs are designed to cleanse, nourish, and rejuvenate the skin. Once applied, they are left on for a set period before being rinsed off. Face packs help in tightening pores, removing impurities, and promoting a healthier, more radiant complexion. They can be used as part of a regular skincare routine for enhanced skin care.
