FoLSol (Food Label Solutions) - India's first digital food labelling solution

FoLSol is created to simplify the lives of food businesses. Easy nutrition analysis, nutrition fact labels, ingredient lists, health tags and allergens to tie it all together when you do production. All in the cloud and for a reasonable price. Food Nutrition Assessment and Nutrition Information Labelling can be overwhelming, cumbersome and expensive, given its complexities. We realized the need for a digitised solution in food labeling with accurate information and trusted guidance to handhold food business operators in regulatory labelling guidelines and help them from making expensive errors.

We work with upcoming food businesses, established food businesses, restaurants, home chefs, you name it.

FoLSol is built on the guidelines of FSSAI regulations, ICMR-NIN, USFDA and WHO.

And there you have it! Reliable, do-it-yourself nutrition fact labels for everybody. No more scouring the internet to figure out the rules. Something you can do yourself in very quick time.
