

gasket and seals manufacturer and supplier

Address	A-303, KB ROYAL HOMES, Sneh Plaza Rd, near Hemangi Apartment, Chandkheda,
Contact Person	Manish Purohit
Mobile Number	07878311180
Email	ssisealsgaskets@gmail.com

SSI Seals and Gaskets is a leading manufacturer and supplier of high-performance gaskets and seals for a diverse range of industries. They offer an extensive selection of gaskets crafted from various materials, including rubber, silicone, metal, and composite materials, to cater to the specific requirements of their customers. Their gaskets are meticulously designed to form a reliable barrier, effectively preventing the escape of fluids, gases, or contaminants from machinery, equipment, or systems. Additionally, they are manufactured employing advanced techniques and premium-grade materials to ensure exceptional performance, durability, and resilience against temperature, pressure, and chemical exposure.

SSI Seals and Gaskets offers a comprehensive range of gasket types, including:

Flat gaskets: These are the most prevalent type of gasket and are employed in various applications, including sealing flanges, covers, and joints.

O-rings: These are circular gaskets with a ring-shaped cross-section, utilized to seal joints between cylindrical components.

Gasket sheets: These are large sheets of gasket material that can be precisely cut to the desired size and shape. They are often used for gaskets that require customization.

Gasket tapes: These are rolls of gasket material that are self-adhesive. They are frequently used for temporary gaskets or for sealing minor leaks.

Spiral-wound gaskets: These are gaskets constructed from a metal strip that is tightly wound around a mandrel in a spiral pattern. They are often employed in high-pressure applications.

Beyond gaskets, SSI Seals and Gaskets also provides a wide array of seals, including:

Oil seals: These are seals specifically designed to prevent oil leakage from machinery and equipment.

Shaft seals: These are seals employed to preclude leaks from rotating shafts.

Valve seals: These are seals utilized to prevent leaks from valves.

Pump seals: These are seals utilized to prevent leaks from pumps.

Mechanical seals: These are seals that employ a combination of components to create an impenetrable barrier against leakage.

SSI Seals and Gaskets is a renowned company that consistently delivers high-quality products and services. They are an excellent choice for companies seeking reliable gaskets and seals for their machinery and equipment.
