Contact Person	ivies clinic
Mobile Number	
Email	iviesclinic65@gmail.com

The situation of people with alopecia has greatly improved in the last 50 years. The treatment is now widely accepted by the public and the medical community as a safe and effective way of restoring hair to areas of the scalp that have lost it. Hormones do not cause hair loss; they regulate the hair cycle by controlling the growth cycle of hair follicles. At the same time they regulate the sebum level on the scalp, which affects the hair health and hair growth.
