Hastelloy® C276 alloy sheets are used in an assortment of industrial purposes and mostly used to fertilizers, oil & natural gas, chemicals, automation, condensers, sugar mills & distilleries, gas processing, cement industries, sea water equipment, petrochemicals, ship builders, heat exchangers, paper industries, pumps, Steel industries, etc. Hastelloy C276 sheets plates coils are highly in demand all the year round for their distinctive use. These sheets plates and coils are made out of anti galling stainless material that have outstanding resistance to wear and tear. We also offer these sheets in different size, grades, specification and thickness as per the client's requirements.

Deep Steel Alloy is an eminent manufacturer, supplier and exporter of Hastelloy C276 Sheets. Hence, these Hastelloy C276 plate suppliers **in Mumbai** suggest using this alloy for applications in general corrosive service. Hastelloy C276 Plates has outstanding resistance to pitting, oxidizing and stress – corrosion cracking environments. Hastelloy is an alloy that is mainly constituted of Nickel, molybdenum and chromium and is known for its high anti corrosive nature. It has several other properties like ductility, flexible, durable etc that make it one of the favorite alloys for industrial as well as domestic use.
