Samsung is very developing electronics company. Samsung mobile, tablet, TV and other gadgets are having latest technology. Samsung is the only company who has released maximum number of 5g supported mobile and foldable phone. Lg, Huawei, Xiaomi also released their 5g supported mobile and foldable phone. T-Mobile, sprint, Verizon, bell, telus, o2, orange sell most of the latest Samsung mobile with carrier network locked and unlock condition. Sim locked mobile need imei unlock code for Samsung mobile to remove network restriction.

Samsung is planning to launch galaxy s11 mobile, galaxy watch active series latest smart watches and tablets. Among them samsung galaxy s11 mobile is having more hype. Apple iPhone 11 is just released and Google pixel next model is about to release in October 2019. So Samsung next mobile definitely have more features compare to recent mobile.

Sim Network Unlock Samsung Galaxy s11 expected hardware specification:

Software android version:

It will have latest android 10 version. But Samsung will modify custom it as per smartphone model. It will unlock many hidden features of android mobile.

RAM and mobile internal storage.

12 GB RAM is expected as we will see live gaming and Internet of Things connectivity. Storage capacity will range from 256 GB to 1 TB. Now mobile become equivalent to desktop computer. This will unlock mobile for more personal and professional use.

Processor:

It must be most advanced QUALCOMM snapdragon 8 series processor based on mobile platform with SoC system on a chip. It must support both 5G and 4G network. More importantly processor shall support VR video, live Streaming gaming and Internet of things including artificial intelligence. 5g wireless carrier network will provide Gbps speed which needs to work on Wi-Fi 6. Success of mobile model like Samsung galaxy s10 5g, goggle pixel 2, Motorola Moto z, lg v30, galaxy s9, galaxy note 9, all this mobiles have snapdragon 855 or 845 processor chipset. Which provide great performance and unlock mobile hidden features.

Samsung can use their own processor Exynos 980 5g mobile processor, exynos 9825 next generation mobile chip set which can unlock Samsung galaxy best performance. Or exynos 9610 which is best for photography features.

Network support:

Most of latest Samsung mobile support both 4G and 5G network. This will unlock network carrier support for Samsung galaxy mobile. Samsung galaxy s11 will have both 4G and 5G supported mobile.

Camera display:

Huawei has released 48 M Pixel supported camera mobile. In august Samsung has shown image sensor which can support over 100 Mega pixels. Samsung is aiming for 108 M Pixel with upcoming mobile. Screen will be from 5.8 Inch to 6.8 Inch depending upon model. Samsung already have galaxy fold which has foldable screen.

Samsung also plan to release galaxy watch active series which support e-sim. And also release galaxy tab which latest configuration.

Most of the latest Samsung, LG, Apple iPhone iPad, Google pixel, Motorola, Htc and Nokia mobile are available on installment with Verizon, T-mobile, sprint, roger, bell and telus network. This mobile are sim carrier locked and it need sim network unlock code for Samsung galaxy. After that sim restriction will be removed and you can use any carrier card on it.
