Description:**IVF Clinic in Hyderabad:**

In Vitro Fertilization is an ART Treatment is commonly referred to as IVF. IVF is the process of fertilization by

Extracting eggs, retrieving a sperm sample, and then manually combining an egg and sperm in a laboratory

In an IVF clinic in Hyderabad. The resultant is then transferred to the uterus.

Other forms of ART include gamete intrafallopian transfer (GIFT) and zygote intrafallopian transfer (ZIFT).

The above 2 forms are not in vogue today and only IVF is followed as universal treatment

IVF is suggested to treat infertility in the following patients:

Patients with blocked or damaged fallopian tubes

Male factor infertility involving moderate to low sperm count or sperm motility

Females with ovulation disorders, premature ovarian failure, or with uterine fibroids

Females with fallopian tubes removed

For Individuals with a known genetic disorders

Unexplained infertility
