Metallica Metals India, headquartered in Mumbai, is a longstanding manufacturer and stockist of pipes and tubes made from stainless steel, carbon steel, and high-nickel alloys. Established in 1975, the company has grown from a trading business into a multi-facility industrial operation with manufacturing units across Maharashtra and Gujarat, supplying both domestic and international markets.

The company provides a wide range of seamless and welded pipes and tubes, including large-diameter, high-pressure, high-temperature, and electropolished variants. Its products cater to industries such as energy, chemicals, pharmaceuticals, food and dairy, and general engineering. Metallica Metals India focuses on stringent quality standards, cost-effective production, customised solutions, and on-time delivery.
