Micrologic Integrated Systems (P) Limited, with its headquarters located in Bangalore, India was incepted in the year 2002.

As an automation equipment manufacturer, we are keen to work towards the development of automation solutions for varied industries including electrical and electronics, automotive & auto components, consumer electronics, medical equipment, food, and pharmaceutical industry. We are skilled and widely experienced in mechanics, electronics, software engineering, robotics, and machine vision with our unique adapted competencies in project management, mechanical engineering, electrical and electronics engineering, software development, robotics and machine vision.

All of the end-products undergo automation system testing, inspection, automation system validations and packaging after product assembly, post automation support etc. We also cater our contract manufacturing services for food and pharmaceutical manufacturing automation with industry 4.0 smart machines including other automated solutions for the manufacturing industry.
