Rajhans has constantly delivered successful solutions with a diverse range of quality products. Founded in 1995, Rajhans Plastic Machinery Pvt. Ltd. holds the privilege to be the first company to introduce the concept of screen changers in India. And today, it has the distinction of being a major exporter of **screen changers** as well.

At Rajhans, you'll find a state-of-the-art set-up and infrastructure that helps us carry on highly precise engineering processes. What adds to this infrastructure is a big and strong team of qualified and experienced professionals who produce amazing results in any assignment taken up. We combine complex engineering together with our proven experience to create products that add great value to our clients' production process.

In the field of plastics extrusion, it is important to ensure a perfect filtration process without reducing the quality of the plastic melt. That's why at Rajhans, we undertake a very focused and streamlined approach to production. Our vast experience ensures that the best solutions are delivered for specialized needs. The work begins with the selection of best material, which is then followed by perfect sourcing of the material. This process works together with the designing process. The process ends with timely supply and execution of the material to complete the project perfectly.
