Rattan Tree furniture has strong air permeability and a refreshing feel.

The rustic natural color of rattan can help calm the nerves. If you try to use rattan furniture as much as possible in the bedroom in summer, it will be beneficial to summer heat and sleep. Rattan furniture is warm in winter and cool in summer, and it will become extremely durable after cooking, drying, bleaching, anti-mold, disinfection and other processes during the original processing process. Rattan can be biodegraded, so the use of rattan is beneficial to environmental protection and will not cause pollution to the environment. Dense, strong, light and tough, easy to bend and deform, not afraid of squeezing, not afraid of pressure, soft and elastic. With strong regeneration ability, rattan is a fast-growing plant with a general growth cycle of 5-7 years.
