MR Reporting Software from SANeForce drives every Pharma Business to a Whole new level of Digital Initiatives.

Saneforce's MR Reporting Software is a robust solution designed to streamline the operations of medical representatives and enhance pharmaceutical sales. It offers features like Daily Call Reporting (DCR) for tracking doctor visits and field activities, geo-tagging for real-time location monitoring, and integrated analytics for actionable insights into sales trends and product performance. The software supports e-detailing, enabling representatives to share and track digital content with ease, while its expense management system simplifies reimbursement processes. Accessible across devices, it ensures seamless connectivity for both field representatives and managers. With customizable modules and real-time notifications, the software adapts to unique organizational needs, fostering better collaboration, improving efficiency, and driving business growth in the competitive healthcare market.
