senseimage2021@gmail.com

SenseImage Technologies specializes in the integration of advanced UAV (drone) data acquisition technologies with high performance GIS analysis and visualization tools to produce rich client specific data sets, high quality imagery, terrain feature models and geo-referenced asset inspection and facilities management information.

We are a group of engineers wanted to achieve and give some industrial solutions using the UAV's instead for fun flying and hobbies. After a continuous research of 5 years of R&D and 2 years of product oriental research we came up with a solution and started SENSEIMAGE TECHNOLOGIES innovations in the mid half of 2017.
