Huawei has declared to launch their 5g mobile in July 2019. Model is Huawei Mate 20 X 5g. It has belong 5000 modem to support both 3g /4g and 5g network. RAM is about 8GB and internal storage will be 256 GB. Huawei 5g mobile will be available in store from 22 July for gulf countries and Europe.

Also Huawei Honor series, nova series, mate variant and p series variant upgraded model will be released. Most of the Huawei mobile are available on installment as well as sim unlocked condition on Verizon, sprint, at&t and t-mobile.

Samsung and LG has released their latest smartphone in 2019 include 5g handset and foldable phone. Now in third or last quarter of 2019 we will see new smartphone of Google, Huawei one plus and Xiaomi. Google expected model is Google Pixel 4. But Huawei mate pro 30 will have many distinct features. These Huawei devices are available on EMI. Which are sim carriers locked. It need sim unlock codes for Huawei mobile to use any other carrier card.

Mate pro 30 will come with Hongmeng operating system. Wide screen display to compete with foldable phone of Samsung and LG. Huawei Mate pro 30 has specific application for display to handle more than two screens.

Google has developed android operating system. But all other mobile company modify those mobile os. And add new features to it. Huawei EMUI Emotional User Interface is the latest operating system update for Huawei new models. Recently Huawei released emui 9.1. This update is for both sim unlock Huawei and network carrier locked Huawei mate 20 pro, p20 lite, nova 3i, p30 lite, nova 3 and p3o pro and p20 pro. Update for Huawei p 20 pro will be available from august 2019. Rest mobile update is already started from July 2019.

Huawei is started to trademark it's another operating system Hongmeng to many countries including Canada, Korea and Europe. And Huawei may replace android operating system with Hongmeng. This may result of US china trade war.
