Tarrakki in hindi means 'Prosperity'. We are on a mission to bring prosperity to the lives of Indians by making investment services accessible.

Tarrakki enables banks and financial services companies to quickly launch highly scalable wealth management products on their platform through tarrakki's embedded infrastructure in the form of no code & low code tools, SDKs and APIs. We are the technological backbone for several major fintech and BFSI who rely on our API/SDKs to build and scale wealth products. While we are majorly a B2B company, We also have a D2C product powered by tarrakki Elevo for non-individual investing. Elevo is a brand powered by tarrakki and is India's first investment platform offering digital investments for corporates, MSMEs, NRIs, minors, HUF, trusts.
