Taxilla's Intercompany Close solution offers an integrated platform designed to streamline and automate intercompany financial processes with real-time precision. Key features include:

- **Automated Charge Validation:** Ensures accuracy by automatically validating intercompany charges.

Taxilla

- **AI-Driven Transaction Matching:** Utilizes artificial intelligence to efficiently match transactions, reducing manual effort.

Taxilla

- **Internal Control Reporting:** Provides comprehensive reports to maintain robust internal controls.

Taxilla

- **Intercompany Cost and Revenue Distribution:** Facilitates accurate distribution of costs and revenues among entities.

Taxilla

- **Days Sales Outstanding (DSO) and Customer Insights:** Offers insights into DSO metrics and customer behaviors to optimize cash flow.
Taxilla
- **Revenue Channel Insights:** Analyzes revenue channels to identify growth opportunities.
Taxilla
- **Days Payable Outstanding (DPO) and Payment Insights:** Provides analysis of payment cycles to improve financial planning.
Taxilla

These capabilities aim to enhance financial accuracy, reduce manual interventions, and provide actionable insights for better decision-making.
