With the rotomolding technology, Xiamen Toppla Material Technology Company makes Toppla **portable toilet** better quality than the injection toilet. Toppla has already takes the leads in the portable toilet production in China.

Our products are characterized by light, flexible and eco-friendly features. The Smaller size toilet is light enough to be easily to carried by two people. And it only take 30 minutes to install the toilet by two people. We have a lot of clients from domestic and abroad who have very good impression on our products on the durable, corrosion resistant and solid quality.

Welcome your future business cooperation with our company!
